

**3D SEMI CURVED FULL COVER TEMPERED GLASS**  
**IDEAL FOR USE WITH CASES**

The new **3D SEMI CURVED FULL COVER TEMPERED GLASS SCREEN PROTECTOR** by **IDOL 1991** and **VOLTE-TEL**, is one of the thinnest in the market with **only 0.30mm** thickness, therefore it doesn't add extra volume to your smartphone and it doesn't change the texture of the monitor. However it protects the screen from hard scratches and hits. The new **3D SEMI CURVED FULL COVER TEMPERED GLASS SCREEN PROTECTOR** is designed so that being **absolutely compatible with lifting-edges cases for the screen protection**, and it **doesn't affect the contrast, brightness, colors and screen sensitivity at all** because it is **100% transparent**. It has **high degree of hardness 9H** so it is difficult to scratch or even break, particularly in comparison to simple screen protectors. It is made with **high-precision rounded edges 3D** for greater security and avoidance of injuries. Even if it breaks with a possible blow, it becomes very small pieces without scattering, just like the windshield of the car, so there is no danger of user's injury or screen's scratching. Finally, due to the construction's material, **you get rid of the unsightly bubbles** which can be very easily created if you are using simple screen protectors, as it fits perfectly and very easily to the screen of your smartphone.

**9H SUPER HARDNESS**   **0.30mm Thickness**   **3D CURVED DESIGN**
