

NEW MAGNET BOOK STAND CASES

New **MAGNET BOOK STAND** phone cases from **VOLTE-TEL** for maximum protection, with elegant design. They are made of high-quality soft **PU leather** and provide **magnetic closure in two spots**. Internally, the phone is retained by a **TPU case** made of workable good and **100% clear material**. It has raised edges for better protection of your screen, while at the same time you can have access to all the device functions, such as camera, speakers, microphone and charging port. You have the opportunity to talk or take photos without any problem, while your smartphone is still protected in its case. They are **light and thin**, don't add extra burden and they also have the ability to fall back **and convert into stands**, so as to give you the chance to watch comfortably your favorite multimedia content in landscape mode. Finally, **MAGNET BOOK STAND** doesn't have a clasp so as to give you the chance to **rotate 360°** the front cover and adjust it on the back for greater functionality.
