**SPECIAL BACK FULL GLUE TEMPERED GLASS**

Protect the back of your favorite smartphone with the new **SPECIAL BACK FULL GLUE TEMPERED GLASS SCREEN PROTECTOR** by **IDOL 1991** and **VOLTE-TEL**. It is **only 0.25mm** thick, one of the thinnest on the market, adding no extra bulk to your phone. This tempered glass protects the back of your smartphone from scratches and cracks. It has **glue coating on its back**, is Full Glue, which keeps your screen protector **extremely solid and firmly in place**. In addition, it has **9H hardness** and consequently, is more resistant against scratches, even against cracks, than the regular protectors. It is made with **highly precision 2.5D rounded edges** for greater protection. Even in the case of cracking and shattering, it breaks in small pieces without scattering, just like car windshields, and thus any possibility of injury or screen scratch is eliminated. Finally, it is made of material that **prevents the creation of bubbles** during application and fits perfectly and easily on your smartphone's back.
